

John Pace IV

FRONT END DEVELOPER

Phone: 805-907-5163 • E-Mail: johnpaceiv@me.com • Portfolio: <http://pacehostnet.com>

Skills

Proficient with a vast array of skills, including:

- Variety of Programming Languages: HTML[5], CSS, Javascript, jQuery, PHP, MySQL, Angular, Bootstrap)
- Front End Design and Development
- Back End Development
- Web App Development
- Adobe Applications: Photoshop, Illustrator
- Computers (Hardware and Software)
- Video Production (Editing, Writing, Producing)

Industry Experience

AnimalQuest – Web App Development

- I developed an application for Animal Rescues to aid the rescue and potential adopters find the right animal to adopt. A rescue could register, login, and control their "inventory" via an administration panel. Adopters could search and filter their search by name, age, energy level, and time alone.
- I used the Codeigniter PHP framework to design most of the application. I also utilized the Bootstrap framework for the look and style, jQuery and Javascript for additional functionality, and used AngularJS to develop the easy filter function for the search module. MySQL was also used to house the database.

TLC Website Homepage – Front End Web Development

- I offered to help a local rescue by designing a responsive landing page that would perform the core functionality that most users would use on their mobile device like viewing the available dogs, get contact information, view additional information about ways to support the rescue.
- I utilized the Bootstrap framework and standard HTML and Javascript/jQuery to design the main content. I emphasized the use of Bootstrap to the stakeholders due to its mobile-first methodology.
- The site makes searching and navigating their website much easier on a mobile device, without sacrificing the space on a desktop computer. They have since added and changed their own content, but the structure and frameworks is still there.

Experience

Disney California Adventure Store Operations, Anaheim, CA

2013 to Current

Working Lead/Cast Member

- Worked well with a team of subordinates and management to run a seamless and efficient operation across multiple lines of business.
- Developed documentation to train and update new and existing Cast Members on changes to policy through documents, presentations, and videos.
- Created and supported multiple Microsoft Office tools, including the use of Visual Basic, to aide financial reporting, tracking, and communication.
- Quickly and efficiently troubleshoot computer issues and operational issues in a timely manner.

Target Stores T1100, Thousand Oaks, CA

2009-2013

Guest Service Team Leader (GSA)

- Resourcefully handled operational leadership and administrative duties, especially under pressure.
- Fostered and encouraged honest communication and positive team culture where team members could feel comfortable discussing issues and resolving them without affecting operational effectiveness.
- Utilized company e-mail and Internet resources for scheduling, training, and developed and implemented different training resources and best practices.

Education

Bachelor's Degree in Web Design and Development

April 2013 – October 2015

Full Sail University, Winter Park, FL
